25X1

1. The Kosciuszko Iron and Steel Works (Huta Kosciuszko) in Chorzow (Q51/Y57), on orders from the Ministry of Defense, included in their 1954 production program several dozen sectional bridges constructed of a new type of steel.
2. The model, based on a type of steel bridge used by the German Army, has double footways. The bridges are 20 to 45 meters long and 4.65 to 11.70 meters wide. The spans are 5 and 10 meters long.
